

**Are you ready to face new challenges?
Do you wish to grow with an international high-tech leader?
If so, we want to meet you.**

Adacel Inc. is recognized for its innovative software solutions for operational air traffic management (ATM) and air traffic control (ATC) simulation and training. Our success in Canada and the international market has created opportunities for experienced professionals to join us in the following role:

**Integration and Deployment Specialist
(Montreal - Program Support Services)**

Job Summary:

The Integration and Deployment Specialist maintains Adacel's test systems, providing support to members of the Test Specialist and Product Specialist teams. S/he ensures test system availability by installing and configuring software builds, maintaining test system hardware, and developing scripts that automate installation and configuration processes

Essential Duties and Responsibilities:

- Integrates new software deliverables with existing customer configurations and deployment software on Adacel's test systems in order to support the test efforts of the Test Specialist and Product Specialist teams.
- Oversees test systems planning and maintenance in support of new and existing products.
- Administers test systems servers and collaborates with the Technology department as needed.
- Develops troubleshooting and diagnostic tools for Adacel's test systems.
- Collaborates with Engineering to automate software installation and configuration.
- Collaborates with Engineering on the Configuration Management process.
- Standardizes and documents software and hardware deployment processes.
- Maintains and updates security patches on test systems for Information Assurance.
- Documents test systems, networks, and configurations in Adacel's knowledge base software.
- Collaborates with Engineering and other Operations teams on the production of metrics and reporting.
- Performs other duties as assigned by Supervisor.

Qualifications:

Required

- High School Diploma or equivalent.
- Advanced knowledge of Windows and Linux Operating Systems.
- Advanced knowledge of computer hardware and computer networking.
- Proficiency in Scripting/Coding (AutoIt, Bash, Batch, Python, C#).
- Familiarity with Virtualization software.
- Experience installing complex hardware and software systems.

- Organized with a strong base in time management.
- Good interpersonal and critical thinking skills.
- Knowledge of Microsoft Office products such as Word, Excel, PowerPoint, and Outlook.
- Strong attention to detail.

Desired

- Bachelor's degree in Engineering, Computer Science or a related field.
- CISSP, CCNA, MCSE, MCP, A+, Network+, Linux+, and/or RHCSA certification(s).
- Experience with CentOS or Red Hat Linux distributions.
- Experience with Windows XP, Windows 7, and Windows 10 Operating Systems.
- Knowledge of Aviation and/or Air Traffic Control practices and concepts.
- Previous simulation experience.
- Previous Software Testing and Process Automation experience.
- Previous Configuration Management experience.

Other Qualifications:

- Ability to travel up to 10% annually.
- Must be able to pass a security background check (if requested).
- Occasional lifting – up to 50 lbs.
