

PRODUCT SPECIALIST II

Orlando, FL

Adacel Systems, Inc. (“ASI”) produces simulation and training systems for commercial, defense and export markets. ASI offers a comprehensive range of fully scalable customizable simulation systems from desktop trainer to complete 360-degree room-sized Air Traffic Control tower environments. We provide professional ATC training simulation systems for governments, universities and civilian air traffic control agencies worldwide.

The **Product Specialist II** is an Air Traffic Control (ATC) Subject Matter Expert that will become well rounded in their knowledge of all Adacel products. S/he will help to facilitate the support, training, testing and validation of the systems. **The primary responsibility of this position will be the validation testing of new software releases to ensure that they meet customer requirements and that internal quality standards are maintained within a defined project schedule.**

Responsibilities

- Performs system validation prior to installation and prepares Factory Acceptance Tests and documentation to be performed with the customer.
- Participates in Customer Requirements definition and review.
- Maintains an up-to-date working knowledge of the Adacel products and services to best represent them to potential customers.
- Demonstrates the operation of all Adacel products to new personnel and interested customers at Adacel facilities, on customer sites and at tradeshow.
- Supports, advises and guides the Engineering department in the development of software and hardware functionality.
- Utilizes subject matter expertise to assist with the requirements, design, operation and validation of new product developments.
- Provides regular communication and training to other Operations staff of any modifications made or additional functionality added to the products.
- Assists in System and Software Requirements definition and review.
- Collaborates with the Engineering development team to perform Software and System implementation and verification testing.
- Creates detailed Test verification specifications and the tracing of those test cases to System and Software.
- Assists with the implementation and configuration of Test Automation or Infrastructure initiatives.
- Other duties as assigned by Supervisor.

Required

- Previous experience in Air Traffic Control services or Piloting in a civilian or military environment.
- Prior experience in Training and/or Simulator usage in Air Traffic Control or Flight Simulators.
- Intermediate knowledge of Windows Operating Systems.
- Must be able to pass background and security checks to enable access to civil, government and military sites.
- Currently has or is able to obtain a U.S. passport.
- Must be willing to adhere to Adacel’s Drug Free Workplace Policy.
- Must be willing to travel on a regular basis.

Desired

- Previous Radar Experience.
- Previous Software Testing experience.
- Knowledge of the Software development lifecycle.
