

For Immediate Release

Adacel Adds to Growing Customer Base

Orlando, Florida, May 03, 2017 – Adacel, an industry leader in the design and production of air traffic control training systems, is pleased to announce that it has been awarded a contract to supply an air traffic control (ATC) training simulator to Delex Systems based in Herndon, Virginia.

Under terms of the contract Adacel will supply a nine-channel, MaxSim Tower Simulation System (TSS) that will include positions for Local Control and Ground Control training. The simulator also includes Adacel's state-of-the-art speech recognition system. A comprehensive Instructor Operating Station (IOS) provides instructors with complete pseudo pilot functionality and the capability to control and modify the running scenario. Also included are scenario generation tools to create, edit and save training scenarios. The system will accommodate both individual and team training in the control tower disciplines.

Delex joins an impressive group of ATC training providers that employ Adacel's simulators as an integral part of their curriculum. The Company has more than 350 installations at 232 worldwide locations, which includes tower and radar simulators at 30 U.S. Colleges and Universities and at 110 training establishments and operational airport locations with the FAA, the U.S. military and other commercial enterprises.

"Adacel is pleased to support Delex's commitment to offering the best possible civil aviation training to their international customers," said Gary Pearson, Adacel CEO. "As the major supplier of ATC simulators, we consider it an advantage for our customers to be able to provide training on a common platform."

Adacel's ATC simulators are designed to provide air traffic controllers with realistic hands-on practice that provides proficiency training to assist controllers achieve and maintain their certifications. System footprints range from full-sized 360-degree enclosed versions to compact, easily transportable packages for rapid deployment to alternate training locations.

About Adacel

Adacel is a leading developer of advanced simulation and training solutions, speech recognition applications and operational air traffic management systems. Adacel is particularly well known for innovations within the ATC simulation and speech recognition fields. The Company's products are widely used throughout North America, Europe, the Middle East and the Asia Pacific region. Adacel is listed on the ASX and further information on the Company can be found on its website at www.adacel.com.
