

For Immediate Release

Innovation on Display - Adacel at FAAMA Managing the Skies Expo

Orlando, Florida, (October 26, 2017) - Adacel Systems Inc. (Adacel or the Company) today announced that they will be exhibiting at the FAA Managers Association (FAAMA) 37th Annual Gathering of Eagles and Managing the Skies Expo taking place in Las Vegas, next week.

Adacel supplies the MaxSim Tower Simulation Systems (TSS) used by the FAA to train Air Traffic Controllers at the FAA Academy and more than 30 operational airports throughout the United States.

Adacel will showcase their latest products aimed at improving controller training efficiency and helping training staff maximize the effectiveness of their deployed MaxSim simulators. Visitors to the booth will have the opportunity to see demonstrations of Adacel's latest generation of training products.

Demonstrations will include Adacel's new scenario generation tool which uses real-world air traffic data to create facility traffic representing any day, time or season. Training scenarios can be created in minutes for virtually any airport in the world.

Adacel will also feature their AeroDRIVE airport driving simulator that a growing number of U.S. airports now use to facilitate training for ground vehicle operators and to reinforce airport safety on maneuvering areas.

The FAAMA event combines a conference setting with a tradeshow style exhibition floor, providing an excellent venue for the exchange of ideas on topics of current interest to the aviation community. Adacel will be located at booth #12.

About Adacel

Adacel applies the knowledge of our customers and the expertise of our team with cutting-edge technologies to be the company of choice for advanced air traffic management systems, speech recognition applications and simulation and training solutions for air traffic control and other public safety domains. Adacel has pioneered the integration of speech recognition into simulation products and operational systems; and holds a number of patents on applications to optimize speech processing. Adacel has built a strong international reputation for its products and services through commitment to technological leadership and customer support. We understand the importance of our products and the direct impact their use has on public safety. These responsibilities are reflected in the quality of everything we do. Adacel: Everyday Excellence. For more information please visit www.adacel.com
